### **DETAILED ACTION**

Claims 1-6 are pending in the application.

#### ***Priority***

Applicant has complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 119(e). Receipt of the verified English translation of Provisional Application No. 60/241,838 filed on February 4, 2004 is hereby acknowledged.

#### ***Information Disclosure Statement***

The information disclosure statements (IDS) submitted on 8/3/04 and 11/18/04 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements are being considered by the examiner.

#### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-6 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 17-20 of copending Application No. 10221447. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

***Response to Arguments***

Applicants' arguments, filed 11/18/04, have been fully considered but they are not persuasive.

Applicants argue that if the Examiner has issued a provisional double patenting rejection between two co-pending applications and the only rejection remaining in one application, prior to issuing a Notice of Allowance, is the provisional double patenting rejection, the Examiner should withdraw that rejection and permit the application to issue as the patent. Then, the "provisional" double patenting rejection in the other application (i.e., Application No. 10/221,447) is converted into a double patenting rejection at the time the present application issues as a patent.

This argument is not persuasive because the Examiner has not issued a provisional double patenting rejection in the co-pending application (i.e., Application No. 10/221,447). In fact, the said co-pending application is being prosecuted by another Examiner (who has not issued a provisional double patenting rejection) and thus the application is not available to me to render any Office Action. Thus, the above rejection is maintained.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1621

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
